Sample data. Simulation.

Sample daily snapshot audit: Store 014, Tuesday

AisleWatch AI daily snapshot audit. Every figure and still below is invented to show the report format, and Store 014 is a demo store.

Scheduled stills	Passed	Failed	Tasks open
48	**44**	**4**	**1**
across 6 checks	92% of stills	each one opened a task	at the time of the report

Checks

Check	Stills taken	Passed	Failed
Fire exits clear	6	5	1
Shelf bays stocked	12	10	2
Floors clear	8	7	1
Checkout lanes staffed	8	8	0
Tills attended	6	6	0
Entrance open and clear	8	8	0

Failed stills and their tasks

Time	Check	What the still shows	Task owner	Closure seen on camera
10:50	Shelf bays stocked	Aisle 4, bay 3 empty	Stock team	Bay restocked, seen 11:20
11:05	Floors clear	Aisle 7, spill with no wet floor sign	Store team	Floor clear, seen 11:15
13:10	Shelf bays stocked	Aisle 7, bay 12 empty	Stock team	Bay restocked, seen 13:45
16:00	Fire exits clear	Fire exit D2 blocked by a pallet and a roll cage	Stockroom lead	Open at the time of the report

A failed still opens a task for its owner. The task closes when a later still or the live camera shows the fix.

Sample data. Simulation.

Six of the 48 stills

Fire exit D2
Failed

Aisle 4, bay 3
Failed

Aisle 7 floor
Failed

Checkout lanes
Passed

Till 4
Passed

Entrance
Passed

The stills are simulated camera views with sample overlays. Faces are blurred in every still.

How the audit is set up

- Head office chooses the camera views and the times of day for each store.
- A still is taken from each view at each set time and checked against its standard.
- The report goes to the area manager each day, with failures first.
