Template, filled in at the start of the pilot

Pilot scorecard

An AisleWatch pilot runs for 8 weeks on up to 10 cameras in one or two stores. The fee is fixed up front and credited if you roll out. The go or no-go call is made in writing against measures agreed at the start. The measures below are examples. The retailer chooses the ones that matter and adds its own.

Retailer

Stores in the pilot

NDA signed ☐ Data processing agreement signed ☐

Measures

Measure	How it is measured	Baseline, before the pilot	Target	Result, week 8	Met
Losses at high-loss bays (value or units, from stock counts)					
Alerts reviewed by the store team within the agreed time					
False alerts per store per week					
Checkout queue wait at peak hours					
Empty bay hours per week					
Spills and blocked exits fixed within the agreed time					
Door count accuracy per entrance (hand recount)					

Decision

Go ☐ No-go ☐ Extend, with new measures ☐
